

WHO WE ARE

Women4Change is an inclusive, diverse, grassroots movement comprised of women across Indiana. Our core strength is the rich socioeconomic, racial, religious and ethnic diversity represented in our membership base.

Our goal is to mobilize a more engaged and informed electorate, ensure fair voting rights for all, and advocate for policies to address intersectional women-specific issues, including the gender wage gap, sexual harassment, women's health, fair voting, and maternal/infant mortality.

In November 2016, a group of Indiana women felt that the divisiveness prevalent at the time had the potential to tear apart our democracy. We came together to harness the immense power of Hoosier women to lead change—change to a more civil, politically engaged community; change to a new norm in which women drive decisions on issues that affect their health and economic wellbeing; and change that creates a new paradigm in which all Hoosier women are equipped and empowered to work towards their dreams.

WHAT WE DO

At Women4Change, we work to bring awareness of the intersectionality between women, race, and government. This can spark transformational and impactful conversations as a catalyst to bring much-needed social change.

<p>ACTIVATE</p>  <p>Since our inception in 2016, we have had over 1000 volunteers like you to help us advance our mission. We mobilize our members to become more actively engaged in political and civic life.</p>	<p>EDUCATE</p>  <p>During challenging times, we pivot and meet the needs of our growing membership by offering virtual and in-person programming. This includes how Hoosier women can get involved in government—and how they can make a difference.</p>
<p>COLLABORATE</p>  <p>We partner with a wide range of organizations to maximize our efforts and bring new opportunities to our members.</p>	<p>ADVOCATE</p>  <p>Our Action Advocates, a group of 600+ volunteers focused on legislative advocacy, contact elected officials through emails, phone calls, and letters during the legislative session.
